

Mechatronics Department

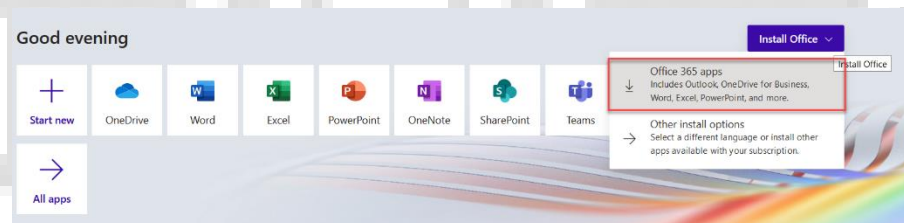

Course: **MTE 506**

Dear students,

This is the first online assignment. It covers most of exercises in the lab so far.

Rules for submission:

1. Create a **private repository** for the course.
2. Invite me to it. I don't need to be an admin, just be able to access your repository.
3. Inside your repository:
 - a. Assignments should be arranged in folders (one for each assignment), so this one will be under **"assignment 1"**
 - b. Inside assignment folder:
 - i. Report (Microsoft word or PDF). Your report must be written in word (**no scanned answers are allowed**). Use equation editor to write equations.
 - ii. You can obtain a **Microsoft office 365 copy** using university email from portal.office.com
4. Due date is important. So, make sure you upload your report **before that date**.
5. Incoming labs will be recorded until finding a robust mean to do it interactively.

Good luck,
Waleed El-Badry
